INDEX OF AUTHORS' NAMES.

TRANSACTIONS AND PROCEEDINGS. 1903.

(Marked T., and P., respectively.)

COMPILED BY MARGARET D. DOUGAL.

A.

Abell, *Robert Duncombe*, the condensation of phenyl ethyl ketone (propiophenone) with benzylideneacetophenone, and of acetophenone with benzylidenepropiophenone, T., 360; P., 17.

a synthesis of 1:3:5-triphenyl-2:4-dimethylcyclopentane and of 1:3:5-triphenyl-2-methylcyclopentane, T., 367; P., 18.

Armstrong, *Edward Frankland*, studies on enzyme action. I. The correlation of the stereoisomeric α- and β-glucosides with the corresponding glucoses, T., 1305; P., 209.

Armstrong, *Henry Edward*, the mechanism of combustion, T., 1088; P., 201.

Aston, *Bernard Cracroft*. See *Thomas Hill* **Easterfield**.

B.

Bacon, *Roger*, presentation of photograph of portrait of, by Mr. Oscar Guttmann, P., 271.

Bamber, *M. Kelway*, estimation of the adulterant in citronella oil, P., 292.

Barger, *George*, a microscopic method of determining molecular weights, P., 121.

Barrowcliff, *Marmaduke*, and *Frederic Stanley* **Kipping**, attempts to prepare isomeric quaternary salts, T., 1141; P., 202.

Bassett, *Henry, jun.*, the mechanism of the reduction of potassium dichromate by sulphurous acid, T., 692; P., 54.

Bassett, *Henry, jun.*, the corrosion of an Egyptian image, P., 194.

Bellars, *Albert Ernest*. See *Robert Selby* **Morrell**.

Bone, *William Arthur*, and *Herbert* **Henstock**, the elimination of hydrogen bromide from bromo-*gem*-dimethylsuccinic acid and from bromotrimethylsuccinic anhydride, T., 1380; P., 247.

Bone, *William Arthur*, and *Charles Henry Graham* **Sprankling**, dissociation constants of trimethylenecarboxylic acids, T., 1378; P., 247.

Bone, *William Arthur*, and *Richard V.* **Wheeler**, the slow oxidation of methane at low temperatures. Part II., T., 1074; P., 191.

Bone, *William Arthur*. See also *Harold Baily* **Dixon**.

Bottomley, *James Frank*, the molecular formulæ of some fused salts as determined by their molecular surface energy, T., 1421; P., 272.

Bowack, *Douglas Anderson*, and *Arthur* **Lapworth**, derivatives of menthyl cyanoacetate, P., 22.

Boyd, *David R.*, action of phosphorus trichloride on the aromatic ethers of glycerol. Part II., T., 1135; P., 202.

Bridgett, *Robert C.* See *Thomas* **Purdie**.

Briggs, *Samuel Henry Clifford*, a series of double chromates, T., 391.

Briggs, *Samuel Henry Clifford*. See also *Julius Berend* **Cohen**.

Brown, *James Campbell*, a direct method for determining latent heat of evaporation, T., 987; P., 164.

Brünnich, *Johannes Christian*, hydrocyanic acid in fodder-plants, T., 788; P., 148.

Burgess, *Charles Hutchens*, and *Alfred* **Holt,** *jun.*, the behaviour of metallic oxides towards fused boric anhydride, P., 221.

Burt, *Bryce Chudleigh*, vapour pressures of sulphuric acid solutions, P., 224.

Burt, *Bryce Chudleigh*. See also *Frederick George* **Donnan.**

C.

Cain, *John Cannell*, the diazo-reaction in the diphenyl series. Part I. On dianisidine and 3:3′-dichlorobenzidine, T., 688; P., 136.

halogen derivatives of diphenyl and dihydroxydiphenyl, P., 284.

Cain, *John Cannell*, and *Frank* **Nicoll,** the rate of decomposition of diazo-compounds. Part II. Diazo-compounds of the naphthalene series, T., 206.

the rate of decomposition of diazo-compounds. Part III. The temperature coefficient, T., 470; P., 63.

Carpenter, *Frederick William*. See *Humphrey Owen* **Jones.**

Carson, *Charles Macdonald*. See *William Robert* **Lang.**

Caven, *Robert Martin*, phosphoric amidines, T., 1045; P., 200.

Chapman, *Alfred Chaston*, essential oil of hops, T., 505; P., 72; discussion, P., 73.

a compound of dextrose with aluminium hydroxide, P., 74.

Chattaway, *Frederick Daniel*, derivatives of *p*-aminoacetophenone, P., 50.

isomeric change of dibenzanilide into benzoyl-*o*-amino- and benzoyl-*p*-amino-benzophenones, P., 57.

derivatives of *o*-aminobenzophenone and *p*-aminobenzophenone, P., 106.

isomeric change of dipropionanilide into propionyl-*p*-aminopropiophenone, P., 124.

Clarke, *George*. See *Frederic Stanley* **Kipping.**

Clayton, *Edwy Godwin*, discoloured rain, P., 101; discussion, P., 103.

further experiments with phosphorus sesquisulphide, P., 281.

Cohen, *Julius Berend*, and *Samuel Henry Clifford* **Briggs,** the rotation of the menthyl esters of the isomeric chlorobenzoic acids, T., 1213; P., 207.

Cohen, *Julius Berend*, and *Henry Drysdale* **Dakin,** the constitution of the products of nitration of aceto-*m*-toluidide, T., 331.

Cooke, *W. Ternent*, the reduction of hydrazoic acid, P., 213.

the action of water and dilute caustic soda solutions on crystalline and amorphous arsenic, P., 243.

Crofts, *James Murray*. See *Robert Selby* **Morrell.**

Crossley, *Arthur William*, 3:5-dichloro-1:1:2-trimethyl-$\Delta^{2:4}$-dihydrobenzene—a correction, P., 227.

Crossley, *Arthur William*, and *Paul* **Haas,** the action of phosphorus haloids on dihydroresorcins. Part II. Dihydroresorcin, T., 494; P., 75.

Crossley, *Arthur William*, and *Henry Rondel* **Le Sueur,** the action of phosphorus haloids on dihydroresorcins. Part I. Dimethyldihydroresorcin, T., 110.

Cumming, *Alexander Charles*, the formation of urea by the direct hydrolysis of lead cyanate, T., 1391; P., 274; discussion, P., 274.

D.

Dakin, *Henry Drysdale*, the hydrolysis of ethyl mandelate by lipase, P., 161.

Dakin, *Henry Drysdale*. See also *Julius Berend* **Cohen.**

Dalton, *John*, centenary of, P., 140.

presentation of bust of, by Dr. Thorpe, P., 141, 212.

Davis, *Bernard Francis*, and *Arthur Robert* **Ling,** action of malt diastase on potato starch paste, P., 275.

Dawson, *Harry Medforth*, the relative affinities of polybasic acids, T., 725; P., 135.

Divers, *Edward*, constitution of nitric peroxide, P., 283.

peroxylaminesulphonic acid, P., 283.

Dixon, *Augustus Edward*, the action of metallic thiocyanates on carbonyl chloride, T., 84.

salts of a mercaptoid isomeric form of thioallophanic acid, and a new synthesis of iminocarbaminethioalkyls, T., 550; P., 104.

Dixon, *Harold*] *Baily,* and *William Arthur* **Bone,** an analysis of the natural gas at Heathfield, Sussex, P., 63.

Dobbie, *James Johnston,* and *Alexander* **Lauder,** on the relation between the absorption spectra and the chemical structure of corydaline, berberine, and other alkaloids, T., 605; P., 7.

the absorption spectra of laudanine and laudanosine in relation to their constitution, T., 626; P., 9; discussion, P., 10.

Dobbie, *James Johnston, Alexander* **Lauder,** and *Charles Kenneth* **Tinkler,** the constitution of cotarnine, T., 598; P., 75; discussion, P., 77.

the relative strengths of the alkaline hydroxides and of ammonia as measured by their action on cotarnine, P., 279; discussion, P., 280.

Donington, *George C.* See *Thomas Martin* **Lowry.**

Donnan, *Frederick George,* and *Bryce Chudleigh* **Burt,** the solubilities and transition points of lithium nitrate, and its hydrates, T., 335; P., 37.

Donnan, *Frederick George,* and *Robert* **Le Rossignol,** the velocity and mechanism of the reaction between potassium ferricyanide and potassium iodide in neutral aqueous solution, T., 703; P., 120.

Dootson, *Frederick William.* See *William James* **Sell.**

Dunstan, *Albert E.,* and *William H. C.* **Jemmett,** the viscosity of liquid mixtures, P., 215.

Dunstan, *Wyndham Rowland,* the chemical reactions involved in the rusting of iron, P., 150.

Dyson, *Gibson,* and *Arthur* **Harden,** the combination of carbon monoxide with chlorine under the influence of light, T., 201.

E.

Easterfield, *Thomas Hill,* and *Bernard Cracroft* **Aston,** rimu resin, P., 190.

the karaka fruit, P., 191.

Easterfield, *Thomas Hill.* See also *Oswald* **Silberrad.**

Eyre, *John Vargas.* See *Raphael* **Meldola.**

F.

Farmer, *Robert Crosbie,* acid salts of monobasic acids, T., 1440; P., 274.

Fenton, *Henry John Horstman,* a reagent for the identification of urea and certain other nitrogen compounds, T., 187.

Forster, *Martin Onslow,* studies in the camphane series. Part X. The constitution of enolic benzoylcamphor, T., 98.

studies in the camphane series. Part XI. The dioximes of camphorquinone and other derivatives of isonitrosocamphor, T., 514; P., 97; discussion, P., 98.

Forster, *Martin Onslow,* and *Ernest Arthur* **Jenkinson,** studies in the camphane series. Part XII. αα-Benzoylnitrocamphors and αα-benzoyliodocamphor, T., 537.

Fortey, (*Miss*) *Emily C.* See *Sydney* **Young.**

Frankland, *Percy Faraday, Henry Leonard* **Heathcote,** and *Clarence James* **Green,** the nitration of diethyl monobenzoyl- and mono-*p*-toluyl-tartrates, T., 168.

Frankland, *Percy Faraday, Henry Leonard* **Heathcote,** and (*Miss*) *Hilda Jane* **Hartle,** nitrotartaric acid and some of its ethereal salts, T., 154.

Frankland, *Percy Faraday,* and *Ernest* **Ormerod,** the influence of cyclic radicles on optical activity; tartaric ar- and ac-tetrahydro-β-naphthylamides, furfurylamide, and piperidide, T., 1342; P., 230.

Frankland, *Percy Faraday,* and *Arthur* **Slator,** the influence of various substituents on the optical activity of tartramide, T., 1349; P., 229.

Fyffe, *William Alexander.* See *James* **Walker.**

G.

Garrett, *Frederic Charles,* and *John Armstrong* **Smythe,** the bases contained in Scottish shale oil. Part II., T., 763; P., 164.

Girvan, *Arthur F.,* the union of carbon monoxide and oxygen, and the drying of gases by cooling, P., 236; discussion, P., 238.

Gostling, (*Miss*) *Mildred,* the action of acids on cellulose, T., 190.

Goulding, *Ernest*, the constituents of the volatile oil of the bark of *Cinnamomum pedatinervium* of Fiji, T., 1093; P., 201.

Gray, *Robert W.*, the density of nitric oxide, P., 66.

Gray, *Thomas*. See *George Gerald* **Henderson**.

Green, *Arthur George*, and *Arthur George* **Perkin**, polythiosulphonic acids of *p*-diamines, T., 1201; P., 206.

Green, *Clarence James*. See *Percy Faraday* **Frankland**.

Gregory, *Thomas William Diggle*, and *William Henry* **Perkin**, *jun.*, hexamethyleneoctacarboxylic acid and the cis- and trans-modifications of hexamethylenetetracarboxylic acid (hexahydropyromellitic acid), T., 780; P., 163.

Griffith, *George*, obituary notice of, T., 650.

H.

Haas, *Paul*. See *Arthur William* **Crossley**.

Haga, *Tamemasa*, peroxylaminesulphonates and hydroxylaminetrisulphonates (sulphazilates and metasulphazilates), P., 281.

Hann, *Archie Cecil Osborn*, and *Arthur* **Lapworth**, the acetoacetic ester synthesis, P., 189.

optically active esters of β-ketonic and β-aldehydic acids. Part IV. Condensation of aldehydes with menthyl acetoacetate, P., 291.

Harden, *Arthur*. See *Gibson* **Dyson**, and *Alexander* **McKenzie**.

Hartle, (*Miss*) *Hilda Jane*. See *Percy Faraday* **Frankland**.

Hartley, *Walter Noel*, the absorption spectra of metallic nitrates. Part II., T., 221.

on colour changes observed in some cobalt salts, T., 401; P., 49.

the absorption spectra of nitric acid in various states of concentration, T., 658; P., 103.

the spectrum of pilocarpine nitrate, P., 122; discussion, P., 123.

Harvey, *Alfred William*, and *Arthur* **Lapworth**, sulphocampholenecarboxylic acid, T., 1102; P., 148.

Heathcote, *Henry Leonard*. See *Percy Faraday* **Frankland**.

Henderson, *George Gerald*, double chloride of molybdenum and potassium, P., 245.

Henderson, *George Gerald*, *Thomas* **Gray**, [and, in part, *Ewing* **Smith**], the chemistry of the terpenes. Part I. The oxidation of pinene with chromyl chloride, T., 1299; P., 195.

Henderson, *George Gerald*, and *James* **Prentice**, the influence of molybdenum and tungsten trioxides on the specific rotations of *l*-lactic acid and potassium *l*-lactate, T., 259; P., 12.

Henstock, *Herbert*. See *William Arthur* **Bone**.

Hibbert, *Harold*, and *John Joseph* **Sudborough**, additive compounds of *s*-trinitrobenzene and alkylated arylamines, T., 1334; P., 225.

estimation of hydroxyl radicles, P., 285.

Hill, *Arthur Croft*, reversibility of enzyme or ferment action, T., 578; P., 99; discussion, P., 100.

Hill, *Ernest George*, the analysis of *Reh*, the alkaline salts in Indian *usar* land, P., 58.

the coloured constituents of *Butea frondosa*, P., 133.

Holmes, *John*. See *Thomas Edward* **Thorpe**.

Holt, *Alfred*, *jun.*, the action of hydrogen on sodium, P., 187.

Holt, *Alfred*, *jun.* See also *Charles Hutchens* **Burgess**.

Hummel, *John James*, obituary notice of, T., 652.

Hummel, *John James*, and *Arthur George* **Perkin**, butein, P., 134.

Hunter, *Albert Edward*, and *Frederic Stanley* **Kipping**, some salts of *d*- and *l*-α-phenylethylamines, T., 1147; P., 203.

Hunter, *Albert Edward*. See also *Frederic Stanley* **Kipping**.

I.

Inglis, *John Kenneth Harold*, notes on ozone: estimation, solubility, and interaction with hydrogen peroxide, T., 1010; P., 197.

Irvine, *James C.* See *Thomas* **Purdie**.

J.

Japp, *Francis Robert*, and *William* **Maitland**, formation of carbazoles by the interaction of phenols, in the ortho-ketonic form, with arylhydrazines, T., 267; P., 19.

Japp, *Francis Robert*, and *Arthur C.* **Michie**, dimorphism of α-methylanhydracetonebenzil, T., 276; P., 20.
the oxidation products of the methyl homologues of anhydracetonebenzil, T., 279; P., 21.
Jemmett, *William H. C.* See *Albert E.* **Dunstan.**
Jenkinson, *Ernest Arthur.* See *Martin Onslow* **Forster.**
Jewson, *Frederick Trevor.* See *George Druce* **Lander.**
Johnson, *F. M. G.* See *Bertram Dillon* **Steele.**
Jolliffe, *E. H.* See *William Robert* **Lang.**
Jones, *Humphrey Owen*, a study of the isomerism and optical activity of quinquevalent nitrogen compounds, T., 1400; P., 228.
Jones, *Humphrey Owen*, and *Frederick William* **Carpenter**, the estimation of hydroxylamine, T., 1394; P., 228.
Jowett, *Hooper Albert Dickinson*, the constitution of pilocarpine. Part IV., T., 438; P., 54.
Jowett, *Hooper Albert Dickinson*, and *Charles Etty* **Potter**, preparation and properties of 1:4(or 1:5)-dimethylglyoxaline and 1:3-dimethylpyrazole, T., 464; P., 56.
the constitution of chrysophanic acid and of emodin, T., 1327; P., 220.

K.

Kametaka, *Tokuhei*, the composition of so-called elæomargaric acid, T., 1042; P., 200.
Kipping, *Frederic Stanley*, isomeric partially racemic salts containing quinquevalent nitrogen. Part VIII. Resolution of the α-modification of hydrindamine bromocamphorsulphonate, T., 873.
isomeric partially racemic salts containing quinquevalent nitrogen. Part IX. Resolution of the β-modification of *dl*-hydrindamine *d*-bromocamphorsulphonate, T., 889.
isomeric partially racemic salts containing quinquevalent nitrogen. Part X. The four isomeric hydrindamine *d*-chlorocamphorsulphonates, $NR_1R_2H_3$, T., 902; P., 164, 166.
isomeric compounds of the type $NR_1R_2H_3$, T., 937; P., 166.
Kipping, *Frederic Stanley*, cis-π-camphanates of *d*- and *l*-hydrindamines, P., 286.
Kipping, *Frederic Stanley*, and *George* **Clarke**, α-amino-β-methylhydrindene, T., 913.
Kipping, *Frederic Stanley*, and *Albert Edward* **Hunter**, phenocycloheptene, T., 246; P., 11.
resolution of α-benzylmethylacetic acid, T., 1005.
Kipping, *Frederic Stanley.* See also *Marmaduke* **Barrowcliff**, *Albert Edward* **Hunter**, *George* **Tattersall**, and *Frank* **Tutin.**

L.

Lander, *George Druce*, synthesis of imino-ethers. *N*-Ethyl-, -methyl-, and -benzyl-benzimino-ethers, T., 320; P., 15.
the molecular rearrangement of *N*-substituted imino-ethers, T., 406; P., 45; discussion, P., 46.
the nature and probable mechanism of the replacement of metallic by organic radicles in tautomeric compounds, T., 414; P., 47.
Lander, *George Druce*, and *Frederick Trevor* **Jewson**, imino-ethers corresponding with ortho-substituted benzenoid amides, T., 766; P., 160.
Lane, *Joseph Henry.* See *Raphael* **Meldola.**
Lang, *William Robert*, the formation of the di- and hexa-methylammoniocadmium chlorides, T., 724; P., 125.
Lang, *William Robert*, and *Charles Macdonald* **Carson**, the action of liquefied ammonia on chromic chloride, P., 147.
Lang, *William Robert*, and *E. H.* **Jolliffe**, the action of methylamine on chromic chloride, P., 147.
Lapworth, *Arthur*, reactions involving the addition of hydrogen cyanide to carbon compounds, T., 995; P., 189.
optically active esters of β-ketonic and β-aldehydic acids. Part III. Azo-derivatives of menthyl acetoacetate, T., 1114; P., 149.
the influence of nitro-groups on the reactivity of halogen derivatives of benzene, P., 23.
the action of halogens on compounds containing the carbonyl group, P., 188.

Lapworth, *Arthur*, and *William W. Scott* **Nicholls**, the action of hypobromites on amides, P., 22.

Lapworth, *Arthur*. See also *Douglas Anderson* **Bowack**, *Archie Cecil Osborn* **Hann**, and *Alfred William* **Harvey**.

Lauder, *Alexander*. See *James Johnston* **Dobbie**.

Lees, *Frederic Herbert*, interactions of ketones and aldehydes with acid chlorides: the formation of benzoxyolefines and 1-benzoxycamphene, T., 145.

Lees, *Frederic Herbert*, and *Frank* **Shedden**, the electrolytic reduction of pheno- and naphtha-morpholones, T., 750; P., 132; discussion, P., 133.

Le Rossignol, *Robert*. See *Frederick George* **Donnan**.

Le Sueur, *Henry Rondel*. See *Arthur William* **Crossley**.

Lewis, *Edward Watkin*, tertiary butylphenol, T., 329; P., 41.

Liebig, *Justus (Freiherr) von*, centenary of, and presentation of bust of, by Dr. Messel, P., 141.

Ling, *Arthur Robert*. See *Bernard Francis* **Davis**.

Lowry, *Thomas Martin*, nitrocamphor and its derivatives. Part V. sesqui-Camphorylhydroxylamine, a product of the spontaneous decomposition of nitrocamphor. Part VI. Camphoryloxime-anhydride. Part VII. β-Bromo-α′-nitrocamphor. β- and π-Bromocamphoryloximes, T., 953; P., 129, 156; discussion, P., 131.

studies of dynamic isomerism. Part I. The mutarotation of glucose, T., 1314; P., 156.

the solubility of dynamic isomerides, P., 156.

Lowry, *Thomas Martin*, and *George C.* **Donington**, camphor-β-thiol, T., 479; P., 57.

Lumsden, *John S.*, a new vapour density apparatus, T., 342; P., 40.

a new form of pyrometer, T., 349; P., 41.

M.

McCrae, *John*, the rotatory power of maldiamide, maldi-*n*-propylamide, and maldibenzylamide, T., 1324; P., 230.

interaction between chloric and hydriodic acids, P., 225.

McIntosh, *Douglas*. See *Bertram Dillon* **Steele**.

McKenzie, *Alexander*, and *Arthur* **Harden**, the biological method for resolving inactive acids into their optically active components, T., 424; P., 48.

McLachlan, *John*, study of the reactions of hydrogen peroxide, P., 216; discussion, P., 217.

Maitland, *William*. See *Francis Robert* **Japp**.

Manley, *John Job*. See *Victor Herbert* **Veley**.

Meldola, *Raphael*, *John Vargas* **Eyre**, and *Joseph Henry* **Lane**, isomeric aminoamidines of the naphthalene series. (Fourth communication on anhydro-bases), T., 1185; P., 205.

Michie, *Arthur C.* See *Francis Robert* **Japp**.

Moody, *Gerald Tattersall*, the rusting of iron, P., 157, 239; discussion, P., 158, 241.

the atmospheric corrosion of zinc, P., 273.

Moore, *Charles Watson*, the formation of phloroglucinol by the interaction of ethyl malonate with its sodium derivative, P., 276.

Morrell, *Robert Selby*, and *Albert Ernest* **Bellars**, ethyl benzylideneanilineacetoacetate, T., 1292; P., 209.

Morrell, *Robert Selby*, and *James Murray* **Crofts**, action of hydrogen peroxide on carbohydrates in the presence of ferrous sulphate. Part IV., T., 1284; P., 208.

N.

Nicholls, *William W. Scott*. See *Arthur* **Lapworth**.

Nicoll, *Frank*. See *John Cannell* **Cain**.

O.

Ormerod, *Ernest*. See *Percy Faraday* **Frankland**.

Orton, *Kennedy Joseph Previte*, isomeric change in benzene derivatives; the conditions influencing the interchange of halogen and hydroxyl in benzenediazonium hydroxides, T., 796; P., 161.

P.

Peachey, *Stanley John*. See *William Jackson* **Pope**.

Perkin, *Arthur George*, and *Frederick Mollwo* **Perkin**, formation of purpurogallin by the electrolytic oxidation of pyrogallol, P., 58.

Perkin, *Arthur George*, and *Samuel* **Phipps**, some natural colouring matters, P., 284.

Perkin, *Arthur George*, and *Alec Bowring* **Steven**, purpurogallin. Part I., T., 192.

Perkin, *Arthur George*, and *Charles Richard* **Wilson**, a reaction of some phenolic colouring matters. Part II., T., 129.

Perkin, *Arthur George*. See also *Arthur George* **Green**, and *John James* **Hummel**.

Perkin, *Frederick Mollwo*. See *Arthur George* **Perkin**.

Perkin, *William Henry, sen.*, the action of nitric acid on methyl dimethylacetoacetate, T., 1217.

simplification of Zeisel's method of methoxyl and ethoxyl determinations, T., 1367; P., 239.

Perkin, *William Henry, jun.*, sulphocamphylic acid and the isomeric α- and β-camphylic acids, T., 835.

Perkin, *William Henry, jun.*, and *Emanuel* **Schiess**, derivatives of β-resorcylic acid and of protocatechuic acid, P., 14.

Perkin, *William Henry, jun.*, and (*Miss*) *Alice Emily* **Smith**, the synthesis of αα-dimethylglutaric acid, of β-hydroxy-αα-dimethylglutaric acid, and of the cis- and trans-modifications of αα-dimethylglutaconic acid, T., 8.

the synthesis of ααγ-trimethylglutaric acid, of the cis- and trans-modifications of β-hydroxy-ααγ-trimethylglutaric acid, and of ααγ-trimethylglutaconic acid, T., 771; P., 163.

Perkin, *William Henry, jun.*, and *Jocelyn Field* **Thorpe**, the synthesis of camphoric acid. Part III. Synthesis of isolauronolic acid, P., 61.

Perkin, *William Henry, jun.* See also *Thomas William Diggle* **Gregory**.

Perman, *Edgar Philip*, vapour pressure of aqueous ammonia solution, T., 1168; P., 204.

Philip, *James Charles*, freezing point curves for some binary mixtures of organic substances, chiefly phenols and amines, T., 814; P., 143; discussion, P., 144.

Phipps, *Samuel* See *Arthur George* **Perkin**.

Pickard, *Robert Howson*, and *Joseph* **Yates**, cholesterol, P., 147.

Plimmer, *Robert Henry Aders*, separation and estimation of silver cyanide and silver chloride, P., 285.

Pope, *William Jackson*, presentation of the Longstaff medal to, P., 180.

Pope, *William Jackson*, and *Stanley John* **Peachey**, preparation of the tetra-alkyl derivatives of stannimethane, P., 290.

Potter, *Charles Etty*. See *Hooper Albert Dickinson* **Jowett**.

Prentice, *James*. See *George Gerald* **Henderson**.

Price, *Thomas Slater*, the composition of Caro's acid, T., 543; P., 107.

Purdie, *Thomas*, and *Robert C.* **Bridgett**, trimethyl α-methylglucoside and trimethyl glucose, T., 1037; P., 193.

Purdie, *Thomas*, and *James C.* **Irvine**, the alkylation of sugars, T., 1021; P., 192.

R.

Rây, *Prafulla Chandra*, and *Jatindra Nâth* **Sen**, decomposition of mercurous nitrite by heat, T., 491; P., 78; discussion, P., 78.

Remfry, *F. G. P.*, and *Jocelyn Field* **Thorpe**, constitution of ethyl cyanoacetate; condensation of ethyl cyanoacetate with its sodium derivative, P., 241.

Report of the International Committee on atomic weights, P., 2.

Reynolds *James Emerson*, researches on silicon compounds. Part VIII. Interactions of silicophenylamide and thiocarbimides, T., 252; P., 6.

presidential address, T., 629; P., 81.

inorganic research; inorganic isomerism; catalysis and inorganic ferments, T., 641; P., 87.

Reynolds, *James Emerson*, and *Emil Alphonse* **Werner**, a study of the dynamic isomerism of thiourea and ammonium thiocyanate: the volumetric determination of thiourea by means of iodine, T., 1.

Richardson, *Arthur*, distillation of chlorine water, T., 380; P., 39.

Roberts, *William*. See *John Joseph* **Sudborough**.

Roberts-Austen, (*Sir*) *William Chandler*, obituary notice of, T., 654.

Robertson, *Philip Wilfred*, studies on comparative cryoscopy. Part I. The fatty acids and their derivatives in phenol solution, T., 1425; P., 223.

Ruhemann, *Siegfried*, action of ammonia and organic bases on ethyl esters of olefinedicarboxylic and olefine-β-ketocarboxylic acids, T., 374, 717; P., 50, 128.
condensation of phenols with esters of unsaturated acids. Part VIII., T., 1130; P., 201.
the action of benzamidine on olefinic β-diketones, T., 1371; P., 246.

Russell, *Edward John*, the reaction between phosphorus and oxygen. Part I., T., 1263; P., 207.

S.

Schiess, *Emanuel*. See *William Henry* **Perkin**, *jun.*

Sell, *William James*, and *Frederick William* **Dootson**, the chlorine derivatives of pyridine. Part VIII. The interaction of 2:3:5:5-tetrachloropyridine with ethyl sodiomalonate, T., 396; P., 48.

Sen, *Jatindra Nâth*. See *Prafulla Chandra* **Rây**.

Shedden, *Frank*. See *Frederic Herbert* **Lees**.

on mixtures of constant boiling point, T., 77.

Young, *Sydney*, and (*Miss*) *Emily C.* **Fortey**, the vapour pressures and boiling points of mixed liquids. Part II., T., 45.

Young, *William John*. See *Jocelyn Field* **Thorpe**.

INDEX OF SUBJECTS.

TRANSACTIONS AND PROCEEDINGS. 1903.

(Marked T., and P., respectively.)

A.

Acetic acid, barium salt, hydrates and solubility of (WALKER and FYFFE), T., 173.

Acetic acid, ethyl ester, and ethyl propionate, vapour pressures and boiling points of mixtures of (YOUNG and FORTEY), T., 47.

Acetic acid, cyano-, ethyl ester, constitution of, and condensation of, with its sodium derivative (REMFRY and THORPE), P., 241.

menthyl ester, and its bromo-derivative (BOWACK and LAPWORTH), P., 22.

Acetoacetic acid, menthyl ester, condensation of, with aldehydes (HANN and LAPWORTH), P., 291.

azo-derivatives of (LAPWORTH), T., 1114; P., 149.

Acetophenone, condensation of, with benzylidenepropiophenone (ABELL), T., 360; P., 17.

Acetophenone, *p*-amino-, chloro- and acyl-derivatives of (CHATTAWAY), P., 50.

β-Acetyl-αβ-diphenyl-α-ethyloxidoethane and its semicarbazone (JAPP and MICHIE), T., 297.

γ-Acetyl-βγ-diphenyl-α-methyl-βγ-oxidobutyric acid and its oxime, and their silver salts, its lactone, and the action of phenylhydrazine on it (JAPP and MICHIE), T., 282; P., 21.

γ-Acetyl-βγ-diphenyl-βγ-oxidobutyric acid and its semicarbazone (JAPP and MICHIE), T., 281; P., 21.

Acid, $C_6H_{10}O_3$, from the oxidation of trihydroxydihydro-α-camphylic acid (PERKIN), T., 840.

Acid, $C_{10}H_{16}O_2$, and its salts, from the oxidation of pinene (HENDERSON, GRAY, and SMITH), T., 1303; P., 196.

$C_{10}H_{18}O_6$, from the oxidation of ***aaa'a'*-tetramethyldihydromuconic acid** (BONE and HENSTOCK), T., 1386; P., 248.

$C_{19}H_{18}O_2$ from 1:4:5-trihydroxy-4:5-diphenyl-1:3-dimethylcyclopentanone-2 (JAPP and MICHIE), T., 302.

Acid chlorides, interactions of, with ketones and aldehydes (LEES), T., 145.

Acids of the oil of *Elæococca Vernicia* (KAMETAKA), T., 1042; P., 200.

monobasic, acid salts of, and the effect of water and alcohol on them (FARMER), T., 1440; P., 274.

polybasic, relative affinities of (DAWSON), T., 725; P., 135.

fatty, and their derivatives in phenol solution, relation between constitution and change of association of (ROBERTSON), T., 1425; P., 223.

lower fatty, and their esters, latent heats of (BROWN), T., 992; P., 164.

inactive, the biological method of resolving, into their optically active components (MCKENZIE and HARDEN), T., 424; P., 48.

inorganic, action of, on cellulose (GOSTLING), T., 190.

Address, congratulatory, to the Literary and Philosophical Society of Manchester on the occasion of the Dalton Centenary, P., 140.

Address, presidential (REYNOLDS), T., 639; P., 81.

AFFINITY, CHEMICAL:—

Affinities, relative, of polybasic acids (DAWSON), T., 725; P., 135.

of some feebly basic substances (WOOD), T., 568; P., 67.

Association, change of, of fatty acids and their derivatives in phenol solution (ROBERTSON), T., 1425; P., 223.

Chemical dynamics of the reactions between benzene and chlorine under the influence of different catalytic agents and of light (SLATOR), T., 729; P., 135.

of the Friedel-Crafts' reaction (STEELE), T., 1470; P., 209.

Decomposition of ammonium nitrite, the conditions of the (VELEY), T., 736; P., 142.

Hydrolysis of carbamide hydrochloride (WALKER and WOOD), T., 484; P., 67.

Period of induction in the reaction between carbon monoxide and chlorine (DYSON and HARDEN), T., 203.

Velocity of decomposition of diazo-compounds (CAIN and NICOLL), T., 206.

influence of temperature on the (CAIN and NICOLL), T., 470; P., 63.

Velocity of oxidation of phosphorus (RUSSELL), T., 1266, 1279; P., 207.

Velocity of reaction between potassium ferricyanide and potassium iodide in neutral aqueous solution (DONNAN and LE ROSSIGNOL), T., 703; P., 120.

Alcohols, fatty, latent heats of (BROWN), T., 991; P., 164.

Aldehyde, $C_{10}H_{16}O$, and its semicarbazone, from the oxidation of pinene (HENDERSON, GRAY, and SMITH), T., 1302; P., 196.

Aldehydes, interaction of, with acid chlorides (LEES), T., 145.

condensation of, with menthyl acetoacetate (HANN and LAPWORTH), P., 291.

β-Aldehydic acids, optically active esters of (LAPWORTH), T., 1114; P., 149; (HANN and LAPWORTH), P., 291.

Alkaline hydroxides, and ammonia, relative strengths of the, as measured by their action on cotarnine (DOBBIE, LAUDER, and TINKLER), P., 279.

Alkaloids, relation between absorption spectra and chemical constitution of (DOBBIE and LAUDER), T., 605; P., 7.

Alkylation of sugars (PURDIE and IRVINE), T., 1021; P., 192; (PURDIE and BRIDGETT), T., 1037; P., 193.

Alkylthiocarbamic acids, imino-, new synthesis of (DIXON), T., 550; P., 104.

Allophanic acid, thio-, salts of a mercaptoid form of (DIXON), T., 550; P., 104.

Aluminium hydroxide, compound of, with dextrose (CHAPMAN), P., 74.

Amides, action of hypobromites on (LAPWORTH and NICHOLLS), P., 22.

Amines, freezing point curves of binary mixtures of phenols and (PHILIP), T., 814; P., 143.

primary, test for (FENTON), T., 187.

Aminoamidines of the naphthalene series, isomeric (MELDOLA, EYRE, and LANE), T., 1185; P., 205.

Ammonia and the alkaline hydroxides, relative strengths of, as measured by their action on cotarnine (DOBBIE, LAUDER, and TINKLER), P., 279.

aqueous solution of, vapour pressure of (PERMAN), T., 1168; P., 204.

liquid, action of, on chromic chloride (LANG and CARSON), P., 147.

action of, on the ethyl esters of olefinedicarboxylic and β-keto-olefinecarboxylic acids (RUHEMANN), T., 374, 717; P., 50, 128.

Ammonium, position of, in the alkali series (TUTTON), T., 1049; P., 185.

Ammonium nickel chromate (BRIGGS), T., 392.

nitrite, the conditions of decomposition of (VELEY), T., 736; P., 142.

sulphate, crystallised (TUTTON), T., 1049; P., 185.

thiocyanate and thiourea, dynamic isomerism of (REYNOLDS and WERNER), T., 1.

Amygdalin, catalytic racemisation of (WALKER), T., 472.

Aniline, alkylated derivatives, compounds of, with *s*-trinitrobenzene (HIBBERT and SUDBOROUGH), T., 1334; P., 225.
dibenzoyl derivative, isomeric change of, into benzoyl-*o*- and -*p*-aminobenzophenones (CHATTAWAY), P., 57.
dipropionyl derivative, isomeric change of, into propionyl-*p*-aminopropiophenone (CHATTAWAY), P., 124.
Anilinoglyoximedimethylmalonylic acid, and *p*-chloro-, methyl esters (PERKIN), T., 1222.
Anilino*iso*triazoxoledimethylmalonylic acid, methyl ester (PERKIN), T., 1226.
Anniversary dinner, P., 88.
Annual General Meeting, T., 629; P., 81.
Antimony, arsenic, and tin, qualitative separation of (WALKER), T., 184.
Arabinose, action of hydrogen peroxide on, in presence of ferrous sulphate (MORRELL and CROFTS), T., 1285; P., 208.
Arsenic, crystalline and amorphous, action of water and of dilute sodium hydroxide on (COOKE), P., 243.
electrolytic estimation of minute quantities of, especially in brewing materials (THORPE), T., 974; P., 183.
estimation of, in fuel (THORPE), T., 969, 985; P., 182.
antimony, and tin, qualitative separation of (WALKER), T., 184.
Association. See Affinity.
Atomic weights, report of the International Committee on, P., 2.
Azoimide (*hydrazoic acid*), reduction of (COOKE), P., 213.

B.

Balance sheet of the Chemical Society, and of the Research Fund. See Annual General Meeting, T., 635.
Bases in Scottish shale oil (GARRETT and SMYTHE), T., 763; P., 164.
affinities of some feeble (WOOD), T., 568; P., 67.
organic, combination of, with di-ortho-substituted benzoic acids (SUDBOROUGH and ROBERTS), P., 286.
action of, on the ethyl esters of olefinedicarboxylic and β-keto-olefinecarboxylic acids (RUHEMANN), T., 374, 717; P., 50, 128.
Benzaldehyde, action of, on ethyl benzoylacetate (RUHEMANN), T., 720; P., 128.
Benzamidine, action of, on ethyl benzylideneacetoacetate, and on ethyl benzylidenemalonate (RUHEMANN), T., 374; P., 50.
action of, on ethyl benzylidenebenzoylacetate, and on its *m*-nitro-derivative, on *m*-nitrobenzylideneacetoacetate, and on *m*-nitrobenzylidenemalonate (RUHEMANN), T., 719; P., 128.
action of, on olefinic β-diketones (RUHEMANN), T., 1371; P., 246.
Benzbenzylamide, imide chloride of (LANDER), T., 326; P., 16.
Benzbenzyl-methyl- and **-ethyl-amides** (LANDER), T., 408; P., 46.
Benzene, chemical dynamics of the reactions between chlorine and, under the influence of different catalytic agents, and of light (SLATOR), T., 729; P., 135.
and carbon tetrachloride, vapour pressures and boiling points of mixtures of (YOUNG and FORTEY), T., 60; P., 216.
and toluene, vapour pressures and boiling points of mixtures of (YOUNG and FORTEY), T., 58.
derivatives, isomeric change in (ORTON), T., 796; P., 161.
haloids, influence of nitro-groups on the reactivity of (LAPWORTH), P., 23.
*s-tri*nitro-, additive compounds of, with substituted anilines and naphthylamines (HIBBERT and SUDBOROUGH), T., 1334; P., 225.
Benzeneazo-β-naphthol, 2:4:6-*tri*bromo- and 2:4-*di*chloro- (ORTON), T., 808; P., 162.
Benzeneazo-1-phenyl-3-methyl-5-pyrazolone, 4-bromo- and 4-chloro- (LAPWORTH), T., 1124; P., 149.
Benzenediazonium hydroxides, the conditions influencing the interchange of halogen and hydroxyl in (ORTON), T., 796; P., 161.
Benzethylamide, imide chloride of (LANDER), T., 320; P., 15.
Benzidine, 3:3′-*di*chloro-, diazonium salt, action of heat on (CAIN), T., 690; P., 136.
Benzimino-methyl and **-ethyl ethers**, *o*-chloro- (LANDER and JEWSON), T., 767; P., 160.
Benzmethylamide, *o*-chloro- (LANDER and JEWSON), T., 768; P., 160.

Benzoic acid, bromo-, nitro- and hydroxy-derivatives of, acid salts of, and the effect of water and alcohol on them (FARMER), T., 1442; P., 274.

isomeric *mono-* and *di*-chloro-, menthyl esters, rotation of (COHEN and BRIGGS), T., 1213; P., 207.

2:4-dihydroxy-. See β-Resorcylic acid.

3:4-dihydroxy-. See Protocatechuic acid.

Benzoic acids, di-ortho-substituted, formation of salts of, with organic bases (SUDBOROUGH and ROBERTS), P., 286.

Benzophenone, *o-* and *p*-amino-, benzoyl derivatives of, from dibenzanilide (CHATTAWAY), P., 57.

bromo-, chloro-, and acyl derivatives of (CHATTAWAY), P., 106.

1-Benzoxycamphene, formation of (LEES), T., 145.

Benzoxyolefines, formation of (LEES), T., 145.

Benzoylacetic acid, ethyl ester, action of benzaldehyde on (RUHEMANN), T., 720; P., 128.

Benzoylacetone, action of *m*-nitrobenzaldehyde on (RUHEMANN), T., 1376; P., 246.

Benzoylcamphor, constitution of enolic, and its ethers (FORSTER), T., 98.

Benzoyldiphenyldihydropyrimidone (RUHEMANN), T., 722; P., 128.

α′-Benzoyl-α-iodocamphor (FORSTER and JENKINSON), T., 537.

αα-Benzoylnitrocamphors, and their *m*-nitro-derivatives (FORSTER and JENKINSON), T., 537.

Benzoyl*iso*nitrosocamphor and its isomeride (FORSTER), T., 533; P., 97.

Benzoyltartaric acid, *m*-nitro-, ethyl ester, preparation and rotation of (FRANKLAND, HEATHCOTE, and GREEN), T., 168.

Benz-*o*- and -*p*-tolyl-methyl- and -ethyl-amides (LANDER), T., 408; P., 46.

***N*-Benzylbenzimino-ethers** (LANDER), T., 326; P., 16.

oxidation of, by atmospheric air (LANDER), T., 328; P., 16.

Benzylideneacetoacetic acid, ethyl ester, action of benzamidine on (RUHEMANN), T., 374, 719; P., 50, 128.

Benzylideneacetophenone, condensation of, with propiophenone (ABELL), T., 360; P., 17.

Benzylideneacetophenone, *m*-nitro- (RUHEMANN), T., 1377; P., 246.

Benzylideneacetylacetone, and *m*-nitro-, and the action of benzamidine on them (RUHEMANN), T., 1373; P., 246.

Benzylideneaminoacetone, and the action of acids on (RUHEMANN), T., 378; P., 50.

Benzylideneanilineacetoacetic acid, ethyl ester, preparation of (MORRELL and BELLARS), T., 1292; P., 209.

Benzylidenebenzoylacetic acid, ethyl ester, and *m*-nitro-, preparation of, and action of benzamidine on (RUHEMANN), T., 720; P., 128.

Benzylidenebenzoylacetone, compound of, with benzamidine, and its *m*-nitro-derivative (RUHEMANN), T., 1376; P., 246.

Benzylidenebenzyl cyanide, condensation of, with hydrogen cyanide (LAPWORTH), T., 998; P., 189.

Benzylidenebisbenzoylacetic acid, and *m*-nitro-, ethyl esters (RUHEMANN), T., 717, 1372; P., 128.

Benzylidenebisbenzoylacetone (RUHEMANN), T., 1376; P., 246.

Benzylidenedeoxybenzoin, *m*-nitro- (RUHEMANN), T., 1378; P., 247.

Benzylidenemalonic acid, ethyl ester, action of benzamidine on (RUHEMANN), T., 374; P., 50.

m-nitro-, ethyl ester, and the action of benzamidine on (RUHEMANN), T., 723; P., 129.

Benzylidenepropiophenone, condensation of, with acetophenone (ABELL), T., 360; P., 17.

α-Benzylmethylacetic acid, resolution of (KIPPING and HUNTER), T., 1005.

Berberine, relation between the absorption spectra and chemical structure of, corydaline, and other alkaloids (DOBBIE and LAUDER), T., 605; P., 7.

Bisditolyloxy*iso*propyl phosphites (BOYD), T., 1139; P., 202.

Bisnaphthaketocoumaran (RUHEMANN), T., 1133; P., 202.

Bisnaphtharonyl, reduction of (RUHEMANN), T., 1133; P., 202.

Boiling points and vapour pressures of mixed liquids (YOUNG and FORTEY), T., 45; (YOUNG), T., 68.

Boric anhydride, fused, behaviour of metallic oxides towards (BURGESS and HOLT), P., 221.

Brewing materials, electrolytic estimation of minute quantities of arsenic in (THORPE), T., 974; P., 183.

Bunsen burner, carbon monoxide as a product of combustion by the (THORPE), T., 318; P., 14.

Butanedicarboxylic acids. See Dimethylsuccinic acids.

Butane-αα'γ-tricarboxylic acid, α-bromo- and α-iodo-, ethyl esters (SILBERRAD and EASTERFIELD), P., 38.

Butea frondosa, coloured constituents of (HILL), P., 133; (HUMMEL and PERKIN), P., 134.

Butein (HUMMEL and PERKIN), P., 134.

tert.-**Butylphenol** and 2:6-*di*bromo- (LEWIS), T., 329; P., 41.

4-*tert.*-**Butylphenol-6-sulphonic acid**, 2-bromo-, potassium salt (LEWIS), T., 330; P., 41.

Bye laws, changes in the, P., 199.

C.

*iso***Campholactone** (PERKIN and THORPE), P., 61.

i-α-**Campholytic acid** (PERKIN), T., 853.

β-**Campholytic acid**, bromo-, ethyl ester (PERKIN), T., 860.

Camphor disulphide, preparation of (LOWRY and DONINGTON), T., 482; P., 57.

Camphor, β-bromo-α'-nitro-, and its pseudo-form (LOWRY), T., 960; P., 129.

nitro-, and its derivatives (LOWRY), T., 953; P., 129, 156.

spontaneous decomposition of (LOWRY), P., 129.

*iso*nitroso-, anhydride and stereoisomeride of (FORSTER), T., 530; P., 97.

Camphorquinone, condensation of, with hydrogen cyanide, and the effect of catalytic agents on the reaction (LAPWORTH), T., 996; P., 189.

dioximes of, and their peroxide (FORSTER), T., 514; P., 97.

Camphor-β-thiol and its salts and acetyl and benzoyl derivatives (LOWRY and DONINGTON), T., 479; P., 57.

*sesqui***Camphorylhydroxylamine** (LOWRY), T., 953; P., 129.

Camphoryloxime, β- and π-bromo-, and their acetyl and benzoyl derivatives (LOWRY), T., 966; P., 130.

Camphoryloxime-anhydride (LOWRY), T., 957; P., 156.

Camphylic acids, α- and β-, preparation, constitution, and separation of, and their derivatives (PERKIN), T., 835.

Carbamide, formation of, by the direct hydrolysis of lead cyanate (CUMMING), T., 1391; P., 274.

dissociation constant of (WALKER and WOOD), T., 490; P., 67; (WOOD), T., 576, P., 68.

hydrochloride, hydrolysis of (WALKER and WOOD), T., 484; P., 67.

See also Urea.

Carbamide, thio-. See Thiocarbamide.

Carbazoles, formation of (JAPP and MAITLAND), T., 267; P., 19.

Carbimides, thio-. See Thiocarbimides.

Carbohydrates, action of hydrogen peroxide on, in presence of ferrous sulphate (MORRELL and CROFTS), T., 1284; P., 208.

Carbon *tetra*chloride and benzene, vapour pressures and boiling points of mixtures of (YOUNG and FORTEY), T., 60.

*mono*xide a product of combustion by the Bunsen burner (THORPE), T., 318; P., 14.

combination of, with chlorine, under the influence of light (DYSON and HARDEN), T., 201.

union of, with oxygen, and the drying of gases by cooling (GIRVAN), P., 236.

*di*oxide, state of, in aqueous solution (WALKER), T., 182.

Carbonyl chloride, action of metallic thiocyanates on (DIXON), T., 84.

Carminic acid and its salts (PERKIN and WILSON), T., 138.

Caro's acid, composition of (PRICE), T., 543; P., 107.

Carpinic acid, bromo- (JOWETT), T., 463; P., 56.

Cellulose, action of inorganic acids on (GOSTLING), T., 190.

Chemical constitution of corydaline, berberine, and other alkaloids in relation to their absorption spectra (DOBBIE and LAUDER), T., 605; P., 7.

of laudanine and laudanosine in relation to their absorption spectra (DOBBIE and LAUDER), T., 626; P., 9.

dynamics. See under Affinity.

Chloric acid, interaction of, with hydriodic acid (MCCRAE), P., 225.

Chlorine, chemical dynamics of the reactions between benzene and, under the influence of different catalytic agents and of light (SLATOR), T., 729; P., 135.
combination of, with carbon monoxide under the influence of light (DYSON and HARDEN), T., 201.
Chlorine water, distillation of (RICHARDSON), T., 380; P., 39.
Cholesterol (PICKARD and YATES), P., 147.
Chromates, a series of double (BRIGGS), T., 391.
Chromic chloride, action of liquefied ammonia on (LANG and CARSON), P., 147.
action of, on methylamine (LANG and JOLLIFFE), P., 147.
Chrysophanic acid, constitution of (JOWETT and POTTER), T., 1327; P., 220.
Cinnamene. See Styrene.
Cinnamic acid *di*bromide, and its esters, action of alkalis on (SUDBOROUGH and THOMPSON), T., 666, 1153; P., 106, 204.
Cinnamic acid, isomeric α-bromo-, formation, separation, and transformation of (SUDBOROUGH and THOMPSON), T., 668, 1155; P., 106.
isomeric β-bromo-, and their esters (SUDBOROUGH and THOMPSON), T., 1153; P., 204.

***aaa'a'*-Tetramethyldihydromuconic acid** and its oxidation product (BONE and HENSTOCK), T., 1384; P., 247.

Tetramethylgluconic acid (PURDIE and IRVINE), T., 1033; P., 193.

Tetramethyl glucose (PURDIE and IRVINE), T., 1031; P., 193.

Tetrasulphido-*p*-phenylenediamine (GREEN and PERKIN), T., 1211; P., 206.

THERMOCHEMISTRY:—

Temperature, influence of, on the rate of decomposition of diazo-compounds (CAIN and NICOLL), T., 470; P., 63.

Transition points of lithium nitrate and its hydrates (DONNAN and BURT), T., 335; P., 37.

Transition temperature of the hydrates of barium acetate (WALKER and FYFFE), T., 182.

Latent heat of evaporation, direct method of determining (BROWN), T., 987; P., 164.

Thiocarbamide and ammonium thiocyanate, dynamic isomerism of (REYNOLDS and WERNER), T., 1.

estimation of, volumetrically, by means of iodine (REYNOLDS and WERNER), T., 1.

Thiocarbamides, action of methyl and ethyl chlorocarbonates on (DIXON), T., 550; P., 104.

Thiocarbimides, interactions of, with silicophenylamide (REYNOLDS), T., 252; P., 6.

Tin, arsenic, and antimony, qualitative separation of (WALKER), T., 184.

Toluene and benzene, vapour pressures and boiling points of mixtures of (YOUNG and FORTEY), T., 58.

and ethylbenzene, vapour pressures and boiling points of mixtures of (YOUNG and FORTEY), T., 52.

***p*-Tolueneazo-β-naphthol**, 3:5-*di*bromo- (ORTON), T., 812; P., 162.

***p*-Toluene-4-azo-1-phenyl-3-methyl-5-pyrazolone** (LAPWORTH), T., 1124; P., 149.

Toluic acids, *m*- and *p*-, acid salts of, and the effect of water and alcohol on them (FARMER), T., 1442; P., 274.

***m*-Toluidine**, acetyl derivative, constitution of the products of nitration of, and their chloro-derivatives (COHEN and DAKIN), T., 331.

***o*-Toluimino-methyl** and **-ethyl ethers** (LANDER and JEWSON), T., 769; P., 160.

***p*-Toluyltartaric acid**, nitro-, ethyl ester, preparation and rotation of (FRANKLAND, HEATHCOTE, and GREEN), T., 168.

***p*-Tolylazoacetoacetic acid**, menthyl ester (LAPWORTH), T., 1121; P., 149.

***p*-Tolylazocyanoacetic acid**, menthyl ester, and its rotation (BOWACK and LAPWORTH), P., 23.

Transition-points and **-temperature.** See under Thermochemistry.

αγε-Tribenzoyl-βδ-diphenyl-α-methylpentane (ABELL), T., 362; P., 17.

ααγ-Trimethylacetonedicarboxylic acid, ethyl ester, preparation and reduction of (PERKIN and SMITH), T., 775; P., 163.

Trimethylbenzene, *di*chloro- (CROSSLEY), P., 227.

1:1:2-Trimethyl-$\Delta^{3:4}$-dihydrobenzene, 3:5-*di*chloro- (CROSSLEY), P., 227.

Trimethylene-mono- and **-di-carboxylic acids**, dissociation constants of (BONE and SPRANKLING), T., 1378; P., 247.

Trimethyl glucose (PURDIE and BRIDGETT), T., 1039; P., 193.

***trans*-aaγ-Trimethylglutaconic acid** (*hexylenedicarboxylic acid*), synthesis of (PERKIN and SMITH), T., 777; P., 163.

aaγ-Trimethylglutaric acid (*hexanedicarboxylic acid*), synthesis of, and **βγ-***di*bromo- and **β**-hydroxy- (PERKIN and SMITH), T., 771; P., 163.

2:4:6-Trimethylpyridine from Scottish shale oil and its aurichloride (GARRETT and SMYTHE), T., 763; P., 164.

Trimethylsuccinic acid (*pentanedicarboxylic acid*), hydroxy- (BONE and HENSTOCK), T., 1387.

Trimethylsuccinic anhydride, bromo-, action of alcoholic potash and of diethylaniline on (BONE and HENSTOCK), T., 1387; P., 248.

1:3:5-Triphenyl-2:4-dimethyl*cyclo*pentane, synthesis of (ABELL), T., 367; P., 18.

1:3:5-Triphenyl-2-methyl*cyclo*pentane, synthesis of (ABELL), T., 367; P., 18.

2:4:6-Triphenyl-3-methylpyridine and its hydrochloride and picrate (ABELL), T., 363; P., 17.

Tungsten trioxide, influence of, on the specific rotations of *l*-lactic acid and its potassium salt (HENDERSON and PRENTICE), T., 259; P., 12.

U.

Urea, reagent for the identification of (FENTON), T., 187.
Urea. See also Carbamide.

V.

β-Valeroxyundecylene (LEES), T., 154.
Vanadium *tetra*chloride, reactions of (STEELE), P., 222.
Vapour density apparatus, new (LUMSDEN), T., 342; P., 40.
Vapour pressures and boiling points of mixed liquids (YOUNG and FORTEY), T., 45; (YOUNG), T., 68.
of aqueous ammonia solution (PERMAN), T., 1168; P., 204.
of sulphuric acid solutions (BURT), P., 224.
Vegetable foods, cooked, chemical composition of (WILLIAMS), P., 66.
Velocity of reactions. See under Affinity.
Viscosity of liquid mixtures (DUNSTAN and JEMMETT), P., 215.

W.

Weight, molecular, of fused salts as determined by their molecular surface energy (BOTTOMLEY), T., 1421; P., 272.
a microscopic method of determining (BARGER), P., 121.

X.

Xylenol, bromo-derivatives of (CROSSLEY and LE SUEUR), T., 127.

Z.

Zinc, atmospheric corrosion of (MOODY), P., 273.
